

RUBAHA MUNIR

Pharmacist | [LinkedIn](#) | [Email](#) | 03432789790 | Sargodha, Pakistan

RESEARCH PROFILE

Pharmacist with a strong interest in pharmaceutical research, computational drug discovery, and data driven approaches to drug development. Developing practical knowledge of Computer Aided Drug Design (CADD), including molecular docking, ADMET prediction, computational drug discovery, and basic research workflows. Experienced in pharmaceutical research, scientific writing, literature review, statistical analysis, and scientific communication. Familiar with IBM SPSS, R, GraphPad Prism, Mendeley, EndNote, and scientific literature databases. Seeking an MPhil/MS research opportunity and fully funded scholarship to develop advanced expertise in CADD, pharmacoinformatics, and computational approaches to therapeutic discovery.

RESEARCH INTERESTS

Primary Interests: Computer-Aided Drug Design (CADD), Computational Drug Discovery, Pharmacoinformatics, Molecular Docking, Structure-Based Drug Design

Additional Interests: ADMET Prediction, Drug Target Interactions, Pharmaceutical Research, Drug Delivery, Nanomedicine, Healthcare Data Analysis

EDUCATION

University of Sargodha <i>Doctor of Pharmacy (PharmD) – Final Year</i>	Expected 2026 <i>Sargodha, Pakistan</i>
Punjab Group of Colleges <i>FSc (Pre-Medical)</i>	2021 <i>Pakistan</i>

RESEARCH EXPERIENCE

Doctor of Pharmacy Research Thesis <i>University of Sargodha</i>	2025–2026 <i>Sargodha, Pakistan</i>
- Conducted research on factors associated with kidney failure among end-stage renal disease (ESRD) patients in Sargodha, Pakistan. - Designed and administered a structured questionnaire covering demographic, clinical, medication-related, dietary, environmental, and lifestyle factors. - Applied statistical analysis using IBM SPSS, including descriptive statistics, chi-square testing, Fisher's exact test, Cramer's V, and non parametric analytical approaches. - Worked with research data interpretation, questionnaire reliability, literature review, scientific writing, and preparation of research results and discussion.	

CADD Trainee <i>The Insilico Lab</i>	Training Program <i>Remote</i>
- Developed foundational practical knowledge of Computer-Aided Drug Design and computational drug discovery workflows. - Gained exposure to molecular docking, computational drug discovery, and structure-based analysis of drug–target interactions. - Developed introductory understanding of ADMET prediction and computational evaluation of drug candidates. - Applied computational concepts to understand the role of in-silico approaches in modern drug discovery and pharmaceutical research.	

RESEARCH PROJECTS

Pharmaceutical Nanotechnology Research <i>Nanostructured Lipid Carriers</i>
- Worked on research involving thiol-modified mucoadhesive nanostructured lipid nanocarriers for improving the bioavailability of BCS Class IV drugs. - Developed understanding of formulation principles, drug loading, mucoadhesion, particle size, polydispersity index (PDI), and zeta potential. - Reviewed drug delivery mechanisms and characterization approaches relevant to nanostructured lipid carrier systems.

Scientific Review Research | *Engineered Exosomal Non-Coding RNAs in Alzheimer’s Disease*

- Reviewed emerging applications of engineered exosomal non-coding RNAs for Alzheimer’s disease diagnosis and therapeutic delivery.
- Explored liquid biopsy approaches, extracellular vesicle biomarkers, molecular assays, and engineered exosome-based therapeutic strategies.
- Developed skills in scientific literature analysis, evidence synthesis, scientific writing, and presentation of interdisciplinary biomedical research.

TECHNICAL SKILLS

Computational Drug Discovery: Computer-Aided Drug Design (CADD), Computational Drug Discovery, Molecular Docking, ADMET Prediction, Structure-Based Drug Design

Research & Statistics: IBM SPSS, R, GraphPad Prism, Statistical Analysis, Research Data Interpretation, Literature Search, Research Methodology

Reference Management: Mendeley, EndNote

Scientific Communication: Scientific Writing, Medical Writing, Literature Review, Scientific Content Development, Research Presentation, Visual Content Development

Microsoft Office: Microsoft Word, Microsoft Excel, Microsoft PowerPoint

PROFESSIONAL EXPERIENCE

Research Writing Intern <i>Multiomics – Scientific Writing Training Program</i>	Ongoing <i>Remote</i>
---	---------------------------------

- Assisted with scientific and medical writing tasks, literature review, article structuring, and manuscript layout.
- Developed knowledge of research methodologies, scientific referencing, literature organization, and academic writing practices.

Pharmacy Intern <i>University Model Pharmacy</i>	1 Month <i>Sargodha, Pakistan</i>
--	---

- * Gained practical exposure to professional communication in a pharmacy setting, prescription handling, and inventory control.
- * Developed experience in patient-oriented communication and routine pharmacy operations.

Graphic Designer & Scientific Content Creator <i>Med Sparkles & Biotech Squad</i>	Experience <i>Remote</i>
---	------------------------------------

- * Created professional visual content for healthcare and science-related communication using graphic design principles.
- * Worked collaboratively on visual content development, team activities, and communication-focused projects.
- * Combined scientific understanding with visual communication to present technical information in an accessible format.

CERTIFICATIONS & TRAINING

- **CADD Training** – The Insilico Lab
- **Medical Writing Workshop** – RxConnect PK
- **Leadership and Community Outreach Program** – APSU
- **Scientific Writing Training Program** – Multiomics
